

## **MOONEY PILOT SAFETY PROGRAM – JANDAKOT, OCTOBER 11-13**

The Australian Mooney Pilots Association Ltd (AMPA) is once again pleased to announce that their renowned **Mooney Pilot Safety Program (PSP)** will next run at **Jandakot**, from **October 11-13, 2024**. The program will be run from the Royal Aero Club's premises at Jandakot Airport.

The two and a half day PSP covers a variety of relevant ground school topics concerning flying and operating Mooneys as they were designed (i.e. efficiently and safely), all summarised in a professionally produced course manual. In addition, we have senior Flying Instructors who are very experienced in Mooneys, to take you through a thorough flying program (typically 3-4 flying hours total included). It is possible to just do the ground school, if you wish.

The PSP instructors are highly qualified in Mooneys and other types and are mostly CFIs, ATOs and Grade 1 instructors. We bring them to the PSP from all over Australia to give you the benefit of their experience and skill. The prime focus will continue to be on helping pilots to fly their Mooneys efficiently and well, and to avoid handling errors that have resulted in past accidents. The focus will be on those things that are "specifically Mooney".

We will not be including Biennial Flight Reviews (BFRs) and/or Instrument Renewals as part of the PSP, as it is felt that these activities distract from fundamentals of the course.

Evolving over more than twenty years, we think this course is the best type-specific program of its kind in Australia. It is regularly attended by CASA presenters, and we are also fortunate to enjoy their sponsorship towards the cost of running this course.

This program is suitable both for people who have not previously done a PSP; or as a refresher for those that have. If you are a new owner, operator or hirer of a Mooney, we can't recommend this course highly enough.

Should you not wish to BYO Mooney, three J model Mooneys are also available for hire from RACWA at Jandakot. (Please contact RACWA directly to do that on 08 9417 000)

For members who insure their Mooneys through the AMPA coordinated aircraft insurance program with BMG, you will also receive a \$300 credit off your premium; such is the insurer's confidence in the effectiveness of the PSP in making you a safer pilot.

Accommodation and transport from your hotel will be organised, as well as a PSP dinner to allow you to socialise with the other Mooney flyers and partners. We will arrange aircraft parking for you nearby to RACWA too. Perth in October will hopefully put on some great weather for us.

Please register by completing the registration form at this [link](#) asap. Places are limited. We do not require full payment until June 30<sup>th</sup>. A full course program will be made available later.
