Interior: Cloth Seats, good condition — 7/10

Other

Annual inspection almost completed except engine (10/2026); not yet certified (see Description)

No other known damage history

Description

Description: A well-presented and IFR-equipped Mooney M20F Executive offering an as-is, where-is project opportunity to acquire a performance aircraft known for fuel efficiency.

Engine: The Lycoming IO-360-A1A has been operating “on condition” in the private category in accordance with CASA Airworthiness Directive AD/ENG/4 Amendment 11, and currently has 2236.2 hours since factory overhaul by Lycoming (10-02-1999). During the current annual inspection, one cylinder was removed due to low compression and was found cracked. Additionally, the camshaft and cam followers were found severely spalled, with the faces breaking up, making the engine un-airworthy at this point. The engine will require a bulk strip and repair or overhaul. The aircraft is offered as-is, where-is as a project.

Price: AU$40,000
